PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience in LLM fine-tuning (SFT, LoRA, QLoRA, GRPO), Reinforcement Learning, Retrieval-Augmented Generation (RAG), and multi-agent system design. Skilled in building end-to-end ML pipelines—from model training and optimization to production deployment using FastAPI, Docker, and REST APIs. Proven track record of delivering measurable results: 100% benchmark accuracy on RL tasks, 20% inference latency reduction in production, and 15% cross-domain accuracy improvement in deep learning research.

EDUCATION

B.Tech, Artificial Intelligence & Machine Learning | L.D. College of Engineering, Ahmedabad | July 2023 – July 2027 | CGPA: 8.3/10

EXPERIENCE

AI/ML Engineer Intern | Unada Pvt. Ltd. | Ahmedabad | March 2026 – April 2026

- **Optimized ML inference pipeline** using model quantization and batch processing, reducing API response latency by 20% and improving throughput for 10K+ daily prediction requests.
- **Deployed** real-time model monitoring dashboard (Python, FastAPI) with automated prediction drift detection, reducing production bug identification time by 35%.
- **Shipped 3 ML-driven features** to production within a 4-week sprint cycle, collaborating with cross-functional engineering and product teams using Agile methodology.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript, HTML/CSS

ML / Deep Learning: PyTorch, TensorFlow, Keras, Scikit-learn, HuggingFace Transformers, HuggingFace TRL, OpenCV

AI / LLM / GenAI: Large Language Models (LLMs), LangChain, LangGraph, RAG, Prompt Engineering, Fine-Tuning (SFT, LoRA, QLoRA), GRPO, RLHF, Multi-Agent Systems, CrewAI, Google ADK

Tools / Infrastructure: FastAPI, Flask, REST APIs, Docker, Git, GitHub Actions, FAISS, ChromaDB, PostgreSQL, Next.js, Playwright, Ollama

PROJECTS

Browser Control Agent with Reinforcement Learning | *PyTorch, HuggingFace TRL, LoRA, GRPO, BrowserGym, Docker* | 

- **Fine-tuned Qwen2.5-0.5B** for autonomous web navigation using a two-phase pipeline (SFT warm-up → GRPO), achieving 100% task accuracy on BrowserGym benchmarks—4x improvement over zero-shot baseline.
- **Engineered** Dockerized end-to-end RL training pipeline with custom reward shaping, optimized for deployment on a single 4 GB VRAM GPU.

WebMorph AI — Visual Web Editor | *Next.js, FastAPI, Playwright, Gemini API, Ollama, TypeScript* | 

- **Engineered** a production-ready AI web editor that translates natural language instructions into real-time UI modifications using Gemini Flash and local LLMs, processing 50+ concurrent edit sessions.
- **Architected** a non-destructive JSON style-patching engine with intelligent element bubbling, preserving complex DOM structures and interactive states without layout breakage.

VizDataAI — Natural Language Data Analytics | *FastAPI, LangChain, Multi-Agent Systems, Pandas, Matplotlib* | 

- **Built** an AI-powered data analytics platform enabling natural language querying, manipulation, and visualization via a multi-agent LangChain architecture—40% faster than single-agent baseline.
- **Integrated** local LLM inference (Ollama) for fully offline, privacy-preserving enterprise data analysis with automated chart generation.

Deepfake Detection Research | *TensorFlow, GANs, Domain-Adversarial Networks, OpenCV* | 

- **Developed** deep learning framework for manipulated media detection using domain-adversarial training, improving cross-domain accuracy by 15% on unseen data distributions.
- **Curated** 10,000+ sample dataset spanning FaceSwap, Face2Face, and NeuralTextures generation techniques for robust model evaluation.

ACHIEVEMENTS

- **100% BrowserGym Benchmark** — Achieved state-of-the-art accuracy with a 0.5B-parameter model on autonomous web navigation tasks.
- **Deepfake Research** — Built domain-adversarial detection framework with 15% cross-domain accuracy gain; 10K+ curated evaluation samples.
- **Open Source Contributor** — Maintained 6+ public AI/ML repositories on GitHub with production-quality documentation.
